

# X3K SERIES RODS SPECIFICATIONS

## Description

The X3K series our **all-round range** are specially designed to perform on a wide variety of venues from small lakes to rivers. Real **'working' rods** that serve **all types of fishing** and give a **wonderful medium action** while playing fish. Wolf X3K rods are constructed of high modulus woven carbon, with an ultra matt finish and black whippings.

As to the rings, good quality lightweight SiCs so they work perfectly well but wouldn't add potential flat spots and unnecessary weight which would reduce casting distance. The advanced pattern which gives the strength where needed and keeps the tip nice and light again increasing casting performance. An anti wrap around tip ring was added to help untangle the line when it wraps around the tip. Every little helps.
